RDBASE Project Template for claiming Research Grants & Tax Credits

I ◆ PROJECT OBJECTIVE BEYOND STANDARD PRACTICE:

Illustrate to Government
(Patents, CRA, IRS, etc.):

i) State of Existing technology: Benchmarking methods & sources

Technology limits of "readily available" information to someone "skilled in the art."

| | | <u>Number (#) of</u> | |
|------|----------------------------|----------------------|----------------------|
| i | Internet / Google Searches | _____ | internet sites |
| ii | Articles | _____ | articles |
| iii | Patent searches | _____ | patents |
| iv | Competitive methods | _____ | products / processes |
| v | In-house technologies | _____ | products / processes |
| vi | Potential components | _____ | products |
| vii | Queries to experts | _____ | responses |
| viii | Other | _____ | |

RDBASE PAST links to patents

Hyperlink or upload

ii) Objective(s)

Performance benchmarks (top 5)*

*Quantifiable Objectives
beyond known limits*

| | | <u>Benchmark 1</u> | <u>Benchmark 2</u> |
|-----|----------------------------|--------------------|--------------------|
| i | Existing benchmark | _____ | _____ |
| ii | Units of measure | _____ | _____ |
| iii | Performance objective | _____ | _____ |
| iv | <i>Result (III below)*</i> | _____ | _____ |

Overview of how objectives exceed existing methods

II ▶ TECHNOLOGICAL UNCERTAINTIES

Using "science" to formulate hypotheses & experiments

Variables for experimentation (top 5)**

| | <u>Variable 1</u> | <u>Variable 2</u> |
|------------------|-------------------|-------------------|
| Name of variable | _____ | _____ |

Identify & rank top 5

Overview of how we hypothesized these variables as most

III ● EXPERIMENTAL ACTIVITY

*Defined by tax year**

i) Experimentation method

Number of

Justify sample sizes via "variables"

| | | | | |
|-----|-----------------------|-------|----------------|-----------------|
| i | Analysis / simulation | _____ | alternatives | <i>Quickest</i> |
| ii | Process trials | _____ | runs / samples | <i>Longer</i> |
| iii | Prototypes | _____ | samples | <i>Longest</i> |
| iv | Software | _____ | lines of code | |
| v | Other methods | _____ | revisions | |

Briefly describe experimentation performed during the year

ii) Analysis

| | | | | |
|-----|---------------|-------|----------------------|--------------------------------------|
| i | Results | _____ | * vs. Objectives I | <i>Identify the unexpected</i> |
| ii | Conclusions | _____ | ** on Variables II | <i>Attempt understand "why?"</i> |
| iii | Documentation | _____ | Experiments/Analysis | <i>Proof experiments & costs</i> |

Briefly describe results & related conclusions (i.e. what we learned about inter-relation of stated variables)

iii) Direct Costs

| | | | | |
|-----|-------------|-------|------------------------|---|
| i | Wages | _____ | Hours / Employee | <i>* PROJECTS span multiple years but ACTIVITIES match tax years.</i> |
| ii | Contractors | _____ | Labour \$ / Contractor | |
| iii | Materials | _____ | Consumed/transformed | |

RDBASE - Project Example - Key Criteria Summary

| 1401 - Miniature Printer - TAX CASE (6379249 Canada Inc.) | | | | |
|--|--|--|--|------------------|
| BENCHMARKS | ACTIVITIES BY YEAR | | | |
| | 2014 | | 2015 | |
| | '1-1 | '1-2 | '1-3 | '1-4 |
| | Internet searches: 100 Articles Patent searches: 14 patents Potential components: 7 products Competitive products or processes: 5 products Similar prior in-house technologies: 54 processes | Felt: Static vs. Dynamic Friction | Redesign of the slip clutch | New print driver |
| OBJECTIVES: GOALS | RESULTS | | | |
| Battery life: 20 pages Jam rate: 1 jams/1,000 sheets Ambient humidity limit: 95 % Media thickness upper: 0.1 mm Media thickness lower range: 0.05 mm Speed (pages per minute): 5 ppm felt medium life: 20 1000's / pages Overall reject rate: 0.1 % Cost : 80 \$ | 8 140 87 14.5 17 | 12 95 92 0.11 17 11 | 22 27 0.09 0.04 5 18.5 4 83 | 92 |
| UNCERTAINTIES & KEY VARIABLES | CONCLUSIONS | | | |
| Clutch Plate (surface area & use of ridges) | Y | Y | | |
| Felt (friction, compression & degradation) | Y | | | |
| Moisture vs Anti Curl Mechanism | | | | Y |
| Static vs Dynamic Load | Y | | Y | |
| EXPERIMENT & TEST | METHODS | | | |
| Analysis Trials Prototypes Lines of code | 2300 7 4300 | 77 | 400 70 | 1200 |
| | COSTS | | | |
| Hours Materials \$ Subcontractor \$ | 200 | 750 7500 | 1100 14000 | 300 8000 |
